

GREENHOUSE AND ENERGY MINIMUM STANDARDS (GEMS)

Compliance - Check Testing Results

July 2022 to June 2023 (July 2024 interim report)

Purpose

To report on the selection and check testing of models of Greenhouse and Energy Minimum Standards (GEMS) products undertaken between 1 July 2022 and 30 June 2023.

Background

Check testing refers to principles and procedures the GEMS Regulator uses to verify whether GEMS product models meet minimum energy performance standards (MEPS) and the energy efficiency claims of manufacturers and suppliers.

Check tests are conducted on behalf of the GEMS Regulator by National Association of Testing Authorities (NATA) accredited or affiliated laboratories either in Australia or overseas. View our [GEMS Check Testing Policy – with Validity Criteria](#) for more information about stages and testing.

The check testing results have been published in accordance with section 162 of the *GEMS Act 2012*.

Products tested

Between 1 July 2022 and 30 June 2023¹, the GEMS Regulator undertook stage 1 check testing of 64 models for ten GEMS products.

At the date of reporting:

- 60 models passed the relevant GEMS Determination level requirements;
- 3 models are pending testing finalisation; and
- 1 model failed Stage 1 check testing. The model has subsequently had their registration cancelled, and it can no longer be offered for sale or supply in Australia.

Table 4: Additional model cancellations.¹

GEMS Product	Brand	Model Number	Action Taken
Household refrigerator	Kogan	KAM490FRSF	In September 2022, the registration of Germanica refrigerator (GFD545SS) was cancelled due to a stage 1 check test fail. Both models shared the same technical specifications. Registrant opted to cancel registration. Registration cancelled as of 24 May 2023
Household refrigerator	Ilve	ILREF482FD	In September 2022, the registration of Germanica refrigerator (GFD545SS) was cancelled due to a stage 1 check test fail. Both models shared the same technical specifications. Registrant opted to cancel registration. Registration cancelled as of 26 May 2023

1. In accordance with the Check Testing Policy, once a registration is cancelled, the GEMS Regulator works to identify other models that are registered using the same test report or with the same model specifications.

Monitoring and Enforcing Compliance

The GEMS Regulator reminds all suppliers of GEMS products of their obligations under the [GEMS Act 2012](#). The GEMS Regulator, assisted by GEMS compliance officers and inspectors, monitors compliance with the GEMS Act via a GEMS Compliance Monitoring program of check testing and market surveillance.

Enforcement action, in accordance with the [GEMS Compliance Policy](#), may be taken by the GEMS Regulator where contraventions of the GEMS Act are found. Further information is available at energyrating.gov.au.
